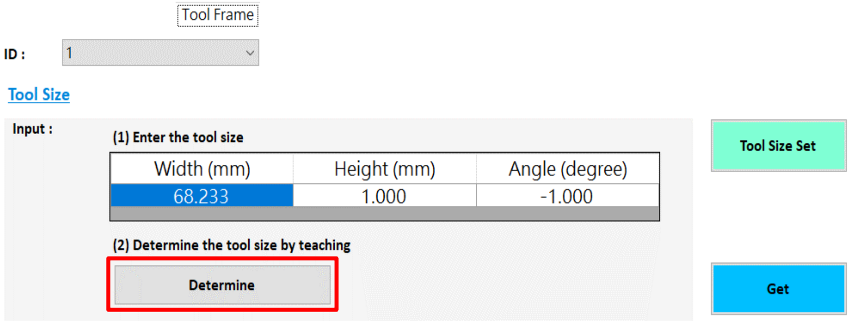
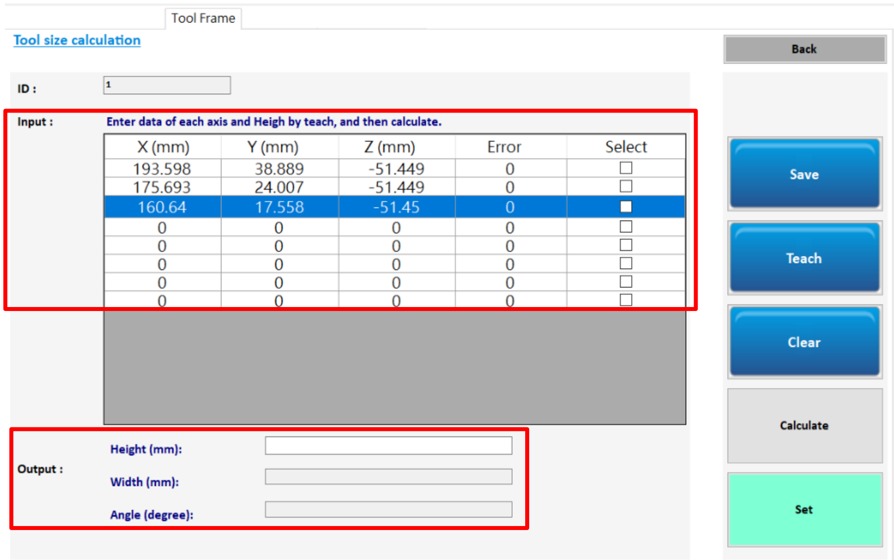
4.7.1 Teaching the tool size

If you want to calculate the tool size by teaching, click **Determine** in the Tool Size area.



The system then displays the Tool size calculation screen:



Name	Description
ID	Select the Tool Frame ID.
Input	Displays the points for teaching the tool size. You need to teach at least three points.
Output	Displays the new tool size after calculation.
Save	Save the points in the table.
Teach	Save the current position of the robot in the table.
Clear	Select a row in the table (which is then highlighted blue), and then click this button to clear the row data.
Calculate	Calculate the Width, Height, and Angle for the tool size. You have to first select the check boxes in the Select column.
Set	Write the calculated tool size (Width, Height, and Angle) to the selected Tool Frame ID.
