

1-6 Motor Characteristic Curves

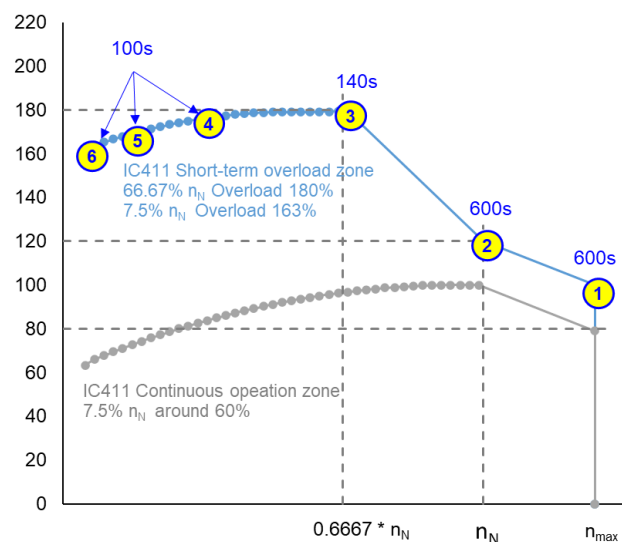

MSI Series continuous intermittent – overload capacity curve:

MSI Air-cooled series cold single overload capacity curve:

- Temperature rising condition: B class, $\Delta T = 80K$
- Overload condition: Cold start in ambient temperature of $25^{\circ}C$ with well ventilation
- The following curve table only supports single-time overload capacity

No.	% n_N	Torque Overload Multiple Ratio (%)	Cold Start Support Time (sec.)
1	126.67	100	600
2	100	120	600
3	66.67	180	140
4	30	175	100
5	16.65	170	100
6	7.5	165	100

n_N	n_{max}	$0.6667 * n_N$
3,000	3,800	2,000
1,500	1,900	1,000

NOTE: n_N = Rated speed, n_{max} = maximum speed
