

2-4 Packaging and Weight

2-4-1 Packaging

- Packaging of Frame 90 (including) and below:

The appearance of the carton box is made according to part specification provided by Delta.

- Packaging of Frame 100 (including) and above:

The appearance of the wooden box is made according to part specification provided by Delta.

1. The appearance and details of the wooden box are as shown in the pictures above.
2. Use wooden box metal corner guards (6 places/ surface) for protection.
3. User iron tie rings to tie the wooden box.

NOTE:

- (1) When the motor is placed in a wooden box, its own weight and the reserved space meet the requirement that the motor does not need to be tied with an iron ring.
- (2) The above internal fixing materials must comply with environmental protection RoHs, REACH and red phosphorus-free requirements and SGS certification.
