

1.2 Screen overview

The software operation screen is divided into three areas:

- Quick access toolbar: for the quick check of the robot status and the use of the function shortcut keys, such as the alarm / warning message (Alarm) and alarm reset function (Reset).
- Main page: the main area for operations such as project management (Project), point management (Point), and program editing (RL).
- Subpage: auxiliary functions for robot operation, such as jogging (JOG) and controller information (Output).
