

The  **RL** page in the menu is divided into four areas:

- **Function bar:** includes the functions such as Start, Pause, and Stop, and the editor shortcut keys such as Copy, Paste, and Search/Replace.
- **Editor area:** the main area to write the program.
- **RL shortcut key:** located in the **RL** tab of the Subpage. The RL shortcut keys allow the user to quickly add RL instructions when writing the program.
- **Output panel:** displays the output variable values, strings, syntax errors, as well as the timestamps.
