

5.1.4 Search/Replace

- To find a specific text in the program, click **Search/Replace**, go to the **Find** tab, enter the text to be found, and then click **Find Previous** or **Find Next**. The found text is automatically highlighted in gray.

- To replace a specific text, click **Search/Replace**, go to the **Replace** tab, and then enter the text to be found and the text to replace it.

When you click **Replace All**, the total number of replaced texts is displayed.
