

The  **License** page in the menu of DRASstudio contains three tabs.

- **DRASstudio:** verify the license(s) of the function(s) related to the DRASstudio software.
- **Registration:** obtain the AuthorityKey (license code) by registering the information of the function.
- **DCS/DCV:** verify the license(s) of the function(s) related to the controller.

The advanced functions are optional for you to purchase as needed. After obtaining the AuthorityKeys, bind them to DRASstudio or the controller, and then you can operate the functions right away. There is no need to re-verify the functions every time DRASstudio is updated to a new version.

11.1 DRASstudio

The functions in the **DRASstudio** tab are PC-bound. For a permanent license, you only need to verify the license once. Contact Delta or the distributor if you want to transfer the verified licenses to another PC.

Area	Name	Description
