How to delete a User Library file

Follow these steps:

1. Right-click the User Library file in the controller, and then click **Delete** to delete the file.

2. Go to the [UserLibrary] folder under the installation folder and delete the corresponding file.

3. Right-click the [UserLibrary] folder in the PC project list, and click **Update** to update the UserLibrary list. You can see that the deleted file has been removed from the list.
