

- **Receiver**

The recipient's E-mail addresses.

- **Event Level**

Select the Event Level. When the event is triggered, an E-mail notification will be sent to the corresponding receivers.

- 1) **Information:** All event notifications are sent to the target address.
- 2) **Warning:** Warning and Alarm event notifications are sent to the target address.
- 3) **Alarm:** Only Alarm event notifications are sent to the target address.

- **Daily Event Log**

If this is selected, all the event logs of each day will be sent in an attachment to the specified receivers at 0:00 AM the next day.

- **Daily Data Log**

If this is selected, all the data logs of each day will be sent to the specified receivers at 0:00 AM the next day.

### ● **Syslog**

Syslog is used to store event logs on remote Syslog servers. This will not affect local event logs. After enabling the Syslog, please set up a server IP address. You can set up at maximum four Syslog servers at a time.

## 5-3-4 User

### ● **Local**

This page allows users to manage the Account Name, Password and Login Limitation for local authentication.
